PERSONAL PROJECTS

Recipe Search Web App (06/2021 - 07/2021)
- It is a recipe web app using the API to allow users to search, view, modify, bookmark and add recipes.This project is made by using vanilla JavaScript.In this project,I made strong knowledge in Javascipt like Classes,using of API, Data-structure,MVC architecture,Babel,Parcel and many more things.

Workout Web App (06/2021 - 06/2021)
- This website is use to see all of your workout's places on map and some details about workout like distance covered,duration,cadence,speed,pace,elevation gain.Features - 1) Displaying Map using Leaflet library2)Position automatically obtained by the browser using Geolocation API3)Show workouts on map4)Move to marker when workout is clicked5)Saving workouts to localstorage

Banking Web App (05/2021 - 06/2021)
- This is simple banking site where you can make withdrawal, deposits and send money to another existing user. If you change the account to another user, the pervious transfer will be displayed.

Responsive Travel Website (03/2021 - 03/2021)
- It is fully responsive travel website. I designed it by myself to improve my designing skills.I used Html,Css and Javascript and gave beautiful animation and layout to it. I imroved my skills in flexbox and grid layout in CSS.
